Manufacturer: Voice Memo In less than 24 hours, you may have heard the earth shake and then the babbling of voices. You are hearing reports of a huge earthquake in the Mojave Desert. There are people in the area who have witnessed strange lights in the sky that look like auroras, but none of them have seen the wave of earthquakes that begin just moments after the quake. Many have even reported feeling a huge electromagnetic pulse, a 20 tesla electromagnetic pulse that can burn all electronics. Some people have seen black helicopters before and in this case, it seems this is just the start of another alien invasion of the earth. Join William Rees to see his video of an alien ship that crashes to the earth and in the same footage, a multitude of strange creatures who seem to be troops are seen running and climbing into different vehicles. In another compilation, we find similar creatures, some of them wearing human clothes, who try to run from the UFOs and are overwhelmed by them. This is a very strange sighting and we cannot be sure if these creatures are here to invade our planet, but we can be sure they don't want us doing that. Join us for analysis of the latest video and discuss about how we may soon be invaded by aliens. We have spoken of seeing the city of New York shake in an earthquake. The waves of energy that emanate from the Great Pyramid are also shaking the city. The once feared aliens are using the pyramid to transmit energy waves. As shown on the video, the aliens are using the human beings as transmitters. The messages put into these humans were specific to our reality, for only those who have seen this video live. In this day and age, it has become necessary to encourage discussion in order to get the truth out. Join us to hear what we have seen on this live footage and witness all the strange activities that are taking place. Tofu and Gouda. Plan Cheese.. Member Highlights Join us for a great topic! We have an extremely insightful topic for you today. We have prepared an awesome video presentation that will highlight the meteor that struck Siberia today. Join us as we try to determine what was once, and could be again, a meteor. Join us as we discuss the difference between a meteor and meteorite. We think that we understand what they are. Join us as we discuss why, if it ever comes back, it could be a doozy. Join us
